

**Partner In Education-Iowa High School
Job 1035-I10**

Saturday August 9th, 2008

GCC went out to Iowa High school to help the school out with a few things. The entrances to the fields were pot-holed badly, so they bladed and rolled stone around the entrances. Spread topsoil and dressed in outfield where the water was holding. Spread some dirt to enlarge and drain the practice field. Also patched the potholes in the school parking lot. The employees also sold BBQ plates to help benefit the high school's baseball team.
