Louisiana Department of Transportation and Development & Gilchrist Construction Company

August 2010

Edition 8

## Contact Information

- **DOTD**  
Phone:(318) 487-5667
- **GILCHRIST**  
Phone:(318) 640-9026

Please feel free to contact DOTD or Gilchrist Construction Company with any questions or concerns.

## Traffic Alert

Due to the change in traffic routes please take extra caution while traveling Susek. Due to the bridge work Tributary 3 (Huntington Ridge), Susek Drive will be closed on both sides of the bridge.

## Susek Drive Update

### Concrete Paving – Bayou Maria Bridge to Huntington Ridge

Concrete paving will start back soon. We are scheduled to start pouring on the East side of Bayou Maria the third week of August. We will have a community impact meeting before we start paving to answer any questions and address any concerns residents may have about this process. We will deliver flyers informing everyone of the time at which the meeting will be held.

### Bridge Work—Bayou Maria Tributary 3

Pile driving is complete at Bayou Maria Tributary 3 and Caps have begun. The decks will follow up and will start around the 2nd of August. This will take about three weeks to complete. Residents living west of Tributary 3 will be able to travel Susek via Edgewood Drive, residents on the east of Tributary 3 will be able to access Susek via Pinehurst.

### Dirt Work - East of Tributary 3

Excavation and embankment has begun East of Tributary 3 up to Castle Oaks. This area is now moving along well. We have class II base course on the road from Huntington Ridge to Woodcliff. We should have stone completed in the area (Huntington Ridge to Oak Brook) by August the 6th.

Please use caution when traveling Susek Drive.

Thank you for your cooperation during the reconstruction of Susek Drive.
